

## MY FUTURE JOB

When I was little, I was surrounded by small animals. I felt no fear even from big and scary dogs. Nowadays I'm in professional training how to ride a horse. Did you know, that you will get immediate feedback from the horse about your state of being, your emotions, and your feelings. I'm fascinated by that natural communication. This could be the reason, why I want to be a veterinarian. Based on my experience with horses, I feel like I'm gifted, by some kind of sensitivity in my hands. That's why I want my own veterinary clinic. I will work with natural remedies. Like homeopathy, special herbs, and specific rehabilitation. My whole life, I grew up with cats at home, I think, I will work with them. Cats and felines need specific health care. I will advise how to feed them, how to care for them, and how to care about their emotional comfort when they live in the capture. This care I won't offer to the zoological gardens.
